

“Any useful statement about the future
should at first seem ridiculous.”

-Jim Dator

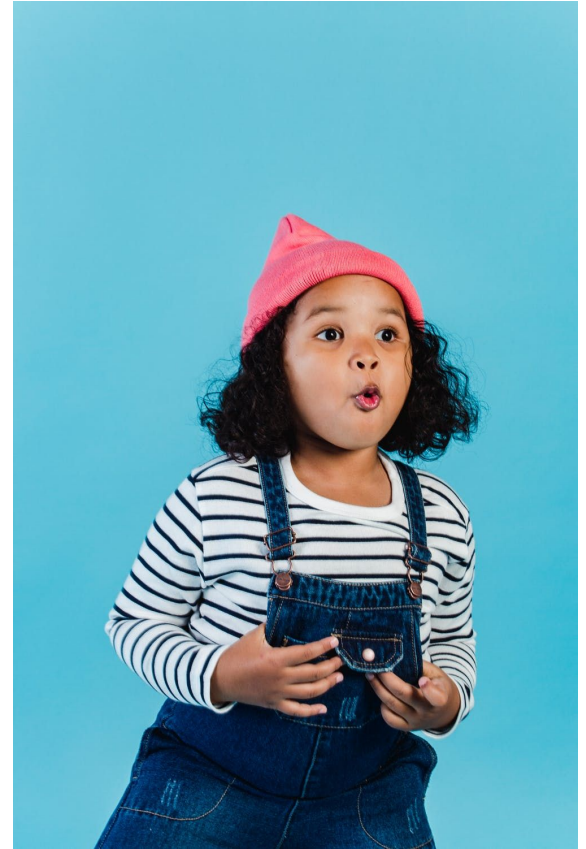

TIJ-IGLP Problem Lab Day 2

Check-in

From the 30 signals that we shared,
were there any that surprised you?
Or scared you? Or made you feel
hopeful?

Let's type in the chat 😊

OCULUS FOUNDER SUGGESTS VIDEO GAMES THAT KILL YOU IN REAL LIFE

Day 2 sneak peek

Palmer Luckey ✓ @PalmerLuckey · Mar 9

The concept of videogames with physical consequences as severe as death are a sci-fi staple, but seen as beyond the pale in real life. Given the popularity of motorsports, extreme athletics, etc: Why?

49

16

213

Ian Thiel @ianthiel · Mar 9

There may be an important difference between necessary and optional danger. It's not possible to do motorsports without real danger, but this isn't the case for modern video games.

2

17

Palmer Luckey ✓

@PalmerLuckey

Replying to @ianthiel

There are quite a few motorsports that can be done without any significant danger, but they aren't nearly as popular (at least in terms of viewership and cultural relevance) as the ones that maim and kill. I think that is at least part of the appeal.

12:48 PM · Mar 9, 2021 · Twitter Web App

He's suggesting that real consequences in games would up the entertainment factor. This is scary!

Signals indicate possible future changes - it does not mean they are likely to happen.

Day 2's objective is to hold deep discussions about forces of change.

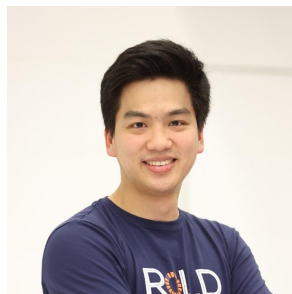

Today is *not* a walk in the park (but we will be accompanied).

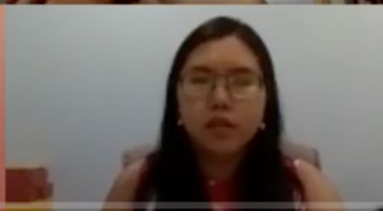

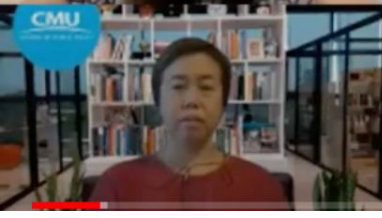

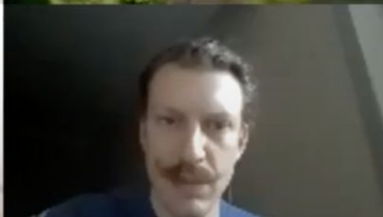

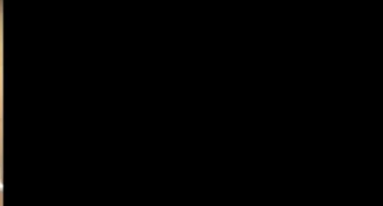

Hello facilitators + tech team

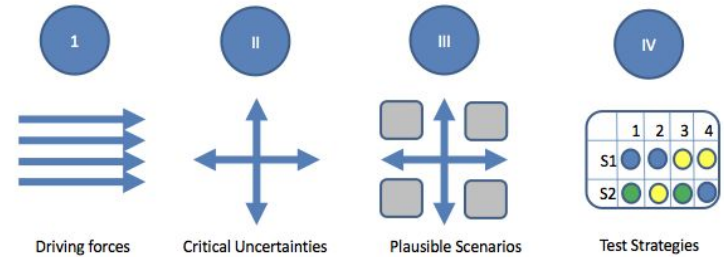

Day 1 Recap

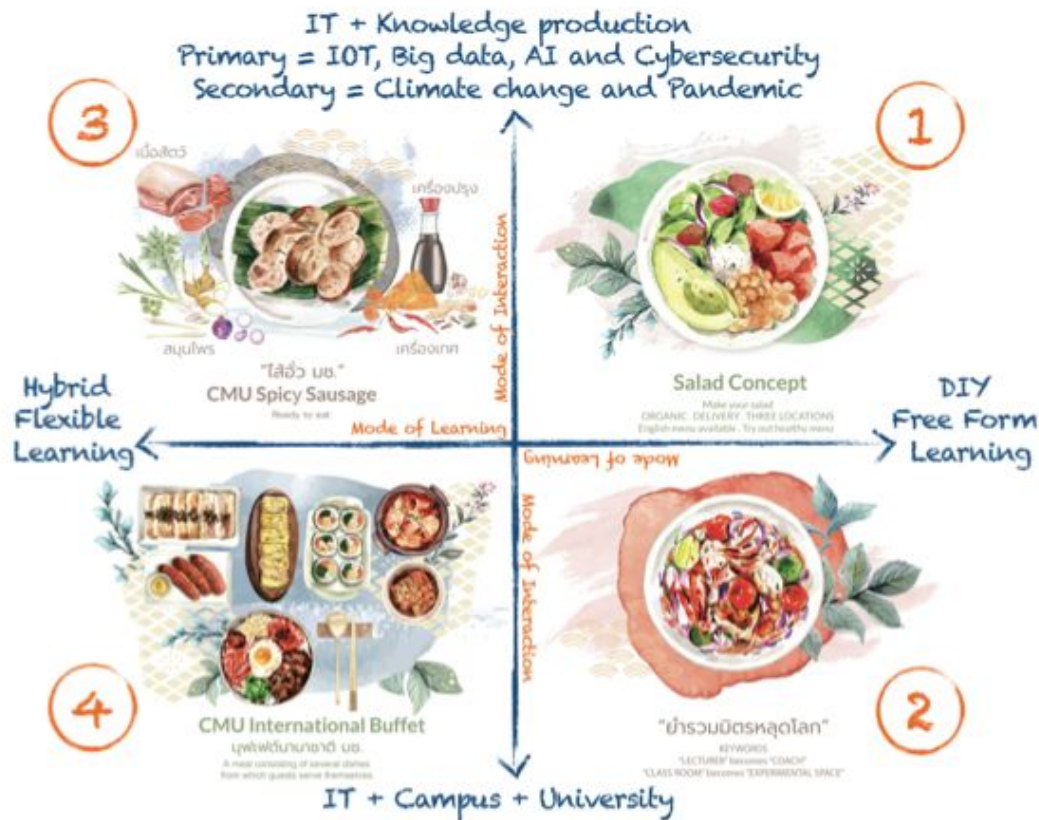

1. Dr. Ora-orn: Futures Thinking in Practice
2. Hopes & Fears
3. Defined vulnerable groups

Scenario planning process

3. Future of Privacy

The influence of privacy on mental health, sense of safety, and people in society in the future.

"Not to see any answer related to religions on LGBT+"

"How often corruption pops up!"

"Many answers focused on structural issues (good surprise)"

1. [IMPORTANT] Review your team's vulnerable groups + Pick one (3 mins)

Take a moment to look at the different groups your team members care about.

Then, as a team agree on a persona who will be your focus for the rest of the Problem Labs by placing a post-it with your name next to it.

We recognize that there is limited time, so we have also found a suggested source for a persona below.

The purpose of this exercise is to create a better understanding and paint a clearer picture of 'whose' future your team will be thinking about. You will be referring to this group throughout Problem Labs 2-4, thus it is essential that this is completed.

Action: As a group, please come to an agreement on who your vulnerable group should be

JohnKennedy
Odipo

(Example)
Name

Vulnerable Group

How are they vulnerable?

Why are they vulnerable?

1 Criminals

Because they are detained

Lack of freedom

2 Elevating HRs standards as recognized by UDHR. Could be one of impediments of adducing evidence in proving of the guilt of alleged offenders.

Who has the authority to access privacy data apart from the owner?

A lack of knowledge and awareness on it.

John
Kennedy
Odipo

Takeshi

3 prisoners

neglect and abuse

neglect and abuse

4 Citizens

Exposure of personal information

No bargaining position

5 too much consideration about privacy is dangerous for the society

Privacy is not a vulnerability I think

Minimum privacy is to be secured to protect them

Suggested source for a persona:

[Irish Prison Service reports 15 data breaches in two years](#)

Notes:

Q&A and draft video from
Day 1 will be added to the
participant handbook

Day 2

Signals & Drivers of Change

Agenda

- | | |
|-------|---|
| 18:50 | Speaker: FutureTales Lab on Drivers of Change |
| 19:20 | Group Exercise: Finding Signals & Drivers |
| 19:40 | Share-out |
| 19:55 | Group Exercise: Finding Uncertainties |
| 20:10 | Debriefs & Next Steps |

Dr. Pannin Sumanasrethakul, *FutureTales Lab*

Current Position:

- Director of Foresight Research, FutureTales Lab

Prior to this, she was the technical advisor on Strategic Foresight study on Security in ASEAN while worked as a full time Faculty member and Director of BA program for School of Global Studies, Thammasat University.

Between 2005 and 2013, Pannin worked as a development practitioner, with the regional geographic focus on East and Southeast Asia, in the areas of women's human rights and its regional mechanism under UN Women. Pannin was born in Bangkok, Thailand and graduated from Rangsit University with a Doctoral Degree in Leadership through an award of full scholarship.

Q&A with Dr. Pannin

Please send your questions through Zoom chat

Today, we will base the discussion (mostly) on the vulnerable group pre-work*

Signal

an event that signifies a change in some aspect of society, such as technology, culture, politics, economics, the laws, or the environment

Drivers

an underlying pattern of change that explains why a series of indicators are observed over time

Discussion etiquette

Join in the conversation

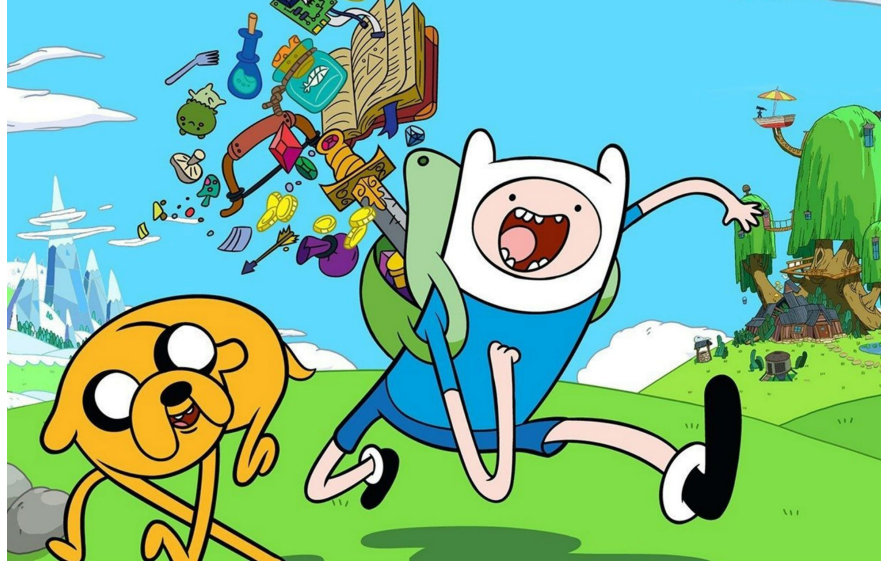

Use everyday language

Listen to others, avoid interruptions/
side discussions

You don't have to agree on everything -
you can debate constructively

MURAL Adventure: Part 1

Signals to Drivers (20 mins)

Welcome back!

We should have now have a list of drivers!

What is an interesting signal or driver
that stood out to your group?

Notes:

Normally, we would look at a lot of signals and observe a pattern between them. This is historical backcasting.

Certainty of drivers of change

refers to the direction of the change or outcome of the drivers.

Feedback Form

Reflect on Problem Lab 2

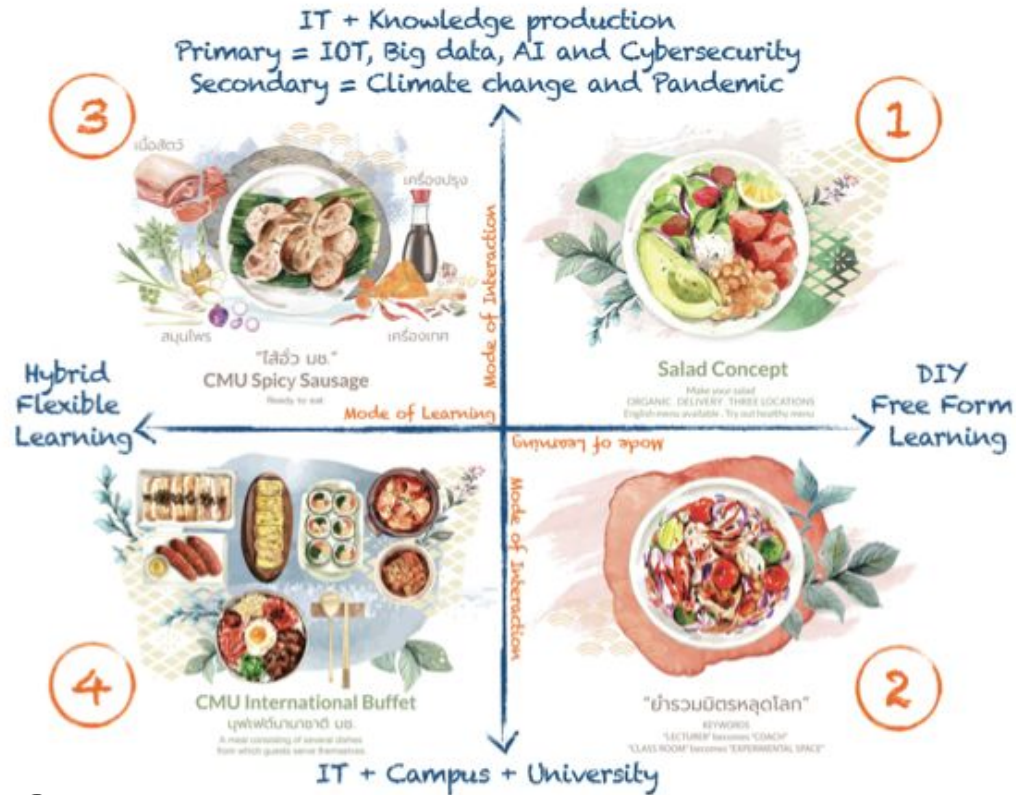

*The link will also be
sent on Zoom chat!*

Facilitators, closing thoughts?

Next Time

1. Scenario planning!
2. NIA on Future of Urbanization
3. Check your emails for homework
