Our journey

3. Future of Privacy

The influence of privacy on mental health, sense of safety, and people in society in the future.

"I'm hopeful about this future because_____"

PDPA!	rspect for mentalissues				personal privacy obtains more support in society		Be guarded by Law
		Privacy will be more seriously considered in the society	Data will improve innovations	Data will be helped to improve the safety and happiness of the people	Connected		Technology solutions
	More tools to help protect privacy	technology can help strengthening protection of privacy	People are more aware of the issue hence voice out	Equal HR protection as recognised by UDHR			Data abused. Privacy made commercial to the extreme.
			help organizations increase trust	Safe and tracable all the use of privacy	people understand and accept more about privacy	Link between business tech & human rights	
	Used for tech development	People is more aware of privacy now		everybody can concentrate on works		DUE TO CURRENT CONVERSATIONS THERE IS MORE AWARENESS AND OPTIONS	
Taking more control of our own privacy and destiny - a safer online community for all.					Privacy will help me away from things I did not want to involve		people have better understanding about it

"I'm fearful about this future because_____"

Companies are trying to use our privacy for their benefits	abuse of those with mental issues			Digital and technology disruption and leads to petration and no privacy at all	The new power dynamics		Profit making from data leaks
technology can be exploited to violate privacy	If the people in power and not kept up with the technological knowledge, they might make the wrong decision	fraud / misuse of confidential data on cyber	Businesses tend to monetize on people privacy	it will be increasingly difficult to ensure	A new lifestyle dilemma	we cannot recognize what other persons do	
technology becomes intrusive			privacy is no longer exist	Policies cannot keep up with the new technologies	A key to "anti-competition" practice	Two different internet world (china & non-china)	
		make everybody alone	Each country has its own policy when it comes to privacy	Impediment for adducing evidence to proof the guilt of the alleged offenders	No complete privacy	Social Media Pricacy and social bully	
		INNOVATION USUALLY CONFLICT/COME WITH COUNTERMEASURES		n	A too difficult topic for people to understand		More avatars' operations
it will be hard to protect our privacy in the digital world		convenience trades off privacy	Maybe AI can know more about me than myself				Vunerables get exposed to risks

GLOBAL CRISIS: Novel Coronavirus 2019 (Covid-19) is a highly contagious virus strain causing a global pandemic

Social Panic
Fear of contracting the virus through human interaction is shifting social and consumer behavior

Economic Turmoil
Manufacturing and tourism/hospitality industries are scrambling to survive

TECHNOLOGY
People are more aware and demanding for their personal hygiene and health
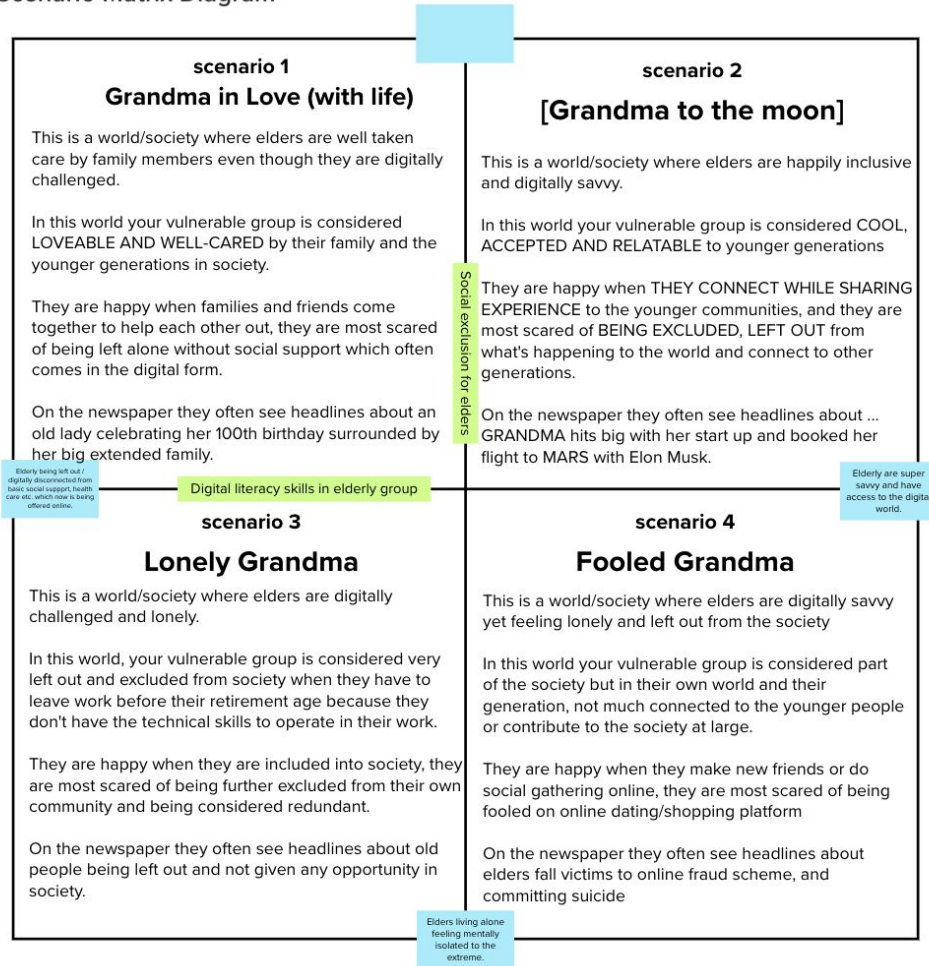

Political Weight
Governments need to get involved in anti-pollution measures if any progress is to be made

Healthcare
People are more aware and demanding for their personal hygiene and health

Scenario Matrix Diagram

Social exclusion for elders

scenario 1
Grandma in Love (with life)

This is a world/society where elders are well taken care by family members even though they are digitally challenged.

In this world your vulnerable group is considered LOVEABLE AND WELL-CARED by their family and the younger generations in society.

They are happy when families and friends come together to help each other out, they are most scared of being left alone without social support which often comes in the digital form.

On the newspaper they often see headlines about an old lady celebrating her 100th birthday surrounded by her big extended family.

Elderly being left out / digitally disconnected from basic social suppprt, health care etc. which now is being offered online.

scenario 2
[Grandma to the moon]

This is a world/society where elders are happily inclusive and digitally savvy.

In this world your vulnerable group is considered COOL, ACCEPTED AND RELATABLE to younger generations

They are happy when THEY CONNECT WHILE SHARING EXPERIENCE to the younger communities, and they are most scared of BEING EXCLUDED, LEFT OUT from what's happening to the world and connect to other generations.

On the newspaper they often see headlines about ... GRANDMA hits big with her start up and booked her flight to MARS with Elon Musk.

Elderly are super savvy and have access to the digital world.

Digital literacy skills in elderly group

scenario 3
Lonely Grandma

This is a world/society where elders are digitally challenged and lonely.

In this world, your vulnerable group is considered very left out and excluded from society when they have to leave work before their retirement age because they don't have the technical skills to operate in their work.

They are happy when they are included into society, they are most scared of being further excluded from their own community and being considered redundant.

On the newspaper they often see headlines about old people being left out and not given any opportunity in society.

scenario 4
Fooled Grandma

This is a world/society where elders are digitally savvy yet feeling lonely and left out from the society

In this world your vulnerable group is considered part of the society but in their own world and their generation, not much connected to the younger people or contribute to the society at large.

They are happy when they make new friends or do social gathering online, they are most scared of being fooled on online dating/shopping platform

On the newspaper they often see headlines about elders fall victims to online fraud scheme, and committing suicide

Elders living alone feeling mentally isolated to the extreme.

Thailand Institute of Justice

Day 4's objective is to invoke future feelings and present actions through narrative.

Agenda

17:45	Speaker: FREAK Lab on speculative futures
18:15	Group discussions: *Postcards from the Future*
19:00	Break
19:10	Group-pair discussions
19:30	Read-out + Present Action
20:00	Closing

Dr. Potiwat Ngamkajornwiwat, *FREAK Lab*

Positions:

- Co-founder and CTO at Automa
- Co-founder and CEO at SpaceZAB Company
- Co-founder in FREAK lab at King Mongkut's University of Technology Thonburi

He received his Ph.D. in Robotics and Automation at King Mongkut's University of Technology Thonburi, 2020. His research areas include embodied artificial intelligence, bio-inspired robotics, Bio-inspired computing, Artificial hormones system, Swarm robotics and space robotics.

Postcards from the Future

It is 2031.

A big event just happened that made the society more desirable for your vulnerable group.

Your vulnerable group is very happy and sends a postcard to celebrate this news.

1. Who are they celebrating this news with?

2. What is the message?

3. What might this postcard look like?

A little inspiration :)

Arms tired from carrying too much debt? Sell your YOUNG, HEALTHY limbs!
Prosthtks are just as good! Lighten your loans with Prosthtks limbs! Say good bye to student loans!

LIMBS 4 LOANS

HIGH QUALITY PROSTHTKS BY:
FOXCONN

MADE IN USA

MARS: FOR A PRICE YOU COULD ONLY DREAM OF

NO Credit Check Needed!

ALL mars without the hussle of going to space

I could've swore I was actually on mars

RECALL VACATIONS Inc.

555-MARS-NOW

WE ALL STARVE IN THIS WAR.

EAT YOUR ENERGY, NEVER STARVE AGAIN.

NEW!

WHY DIET WHEN YOU HAVE SOLAR ENERGY?

GIVE US ENERGY, WE WILL SEND FOOD.

Your postcards could be in any form! Here are some creative ideas
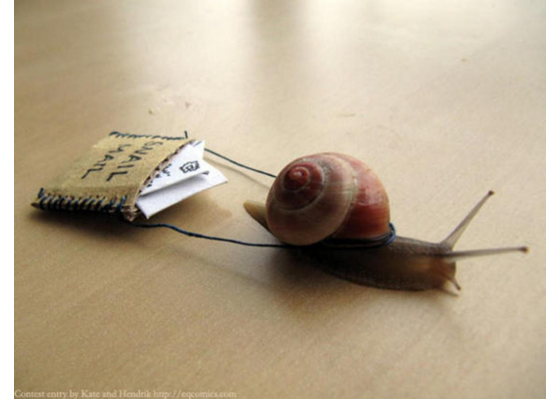

See your presentation template :)

1. This message sent to [Type receiver name here], [Type relationship to person here]

2. [Type the message here]

3. This message is written on [Type (a.) the medium of the message here],
it is sent by [Type (b.) the delivery method here],
it will be received [Type (c.) timespan here].

Team time!

Welcome back!
(we'll share after break)

We'll be right back
10 mins break

Let's share-out (in small teams)

While listening…
Think about how you could help enable that future you're about to hear

Let's hear some narratives!

Hello from 2050,

We write to thank you.
Your ideas from 2021 have turned into reality, and we are now living our best lives.

-   An Earthling of 2050

Future Scenarios

Group 1

Home Sweet Home

Group 4

Grandma to the Moon

Group 6,

Bicentennial Man

What can *I* do today?

Let's Pledge for a Better Future

"I understand that the future is not something that just happens to us, but something we create."

slido

Today I pledge to take my first step which is to...
